

2019 20th KoSEA (Korean Society for Education through Art)  
International Conference

◎ Theme: Art Education for Peace and Coexistence

◎ Conference Date, Time and Place

- September, 21, 2019 (9:00 am ~ 6:00 pm)
- Seoul National University, Seoul, Korea

For the first time as an art education society, this conference has prepared a presentation on the results of research on art education in North Korea. In commemoration of the 20th anniversary of the Korean Society, which has been promoting the discourse of art education and the trend of international research, we have boldly prepared art education in North Korea as the main topic. Based on the need for cultural arts to play a role in bridging the gap between ideas and values that has changed over a long period of time of separation, we have designed this conference in that it is necessary to explore the possibility of art education for peace and coexistence. The lack of information on art education in North Korea has led to an in-depth study by researchers at home and abroad over the past year or so, and has provided a venue for bringing together the results.

The program will present topics such as the introduction of North Korea's curriculum and features, the status of children's art education, the analysis of the theoretical system and curriculum of art education, the case of Korean-Chinese art education in Yan Gil, China, the expression of art in North Korea, and the role of art education in unification. We hope these studies will provide an overview of the current state of art and education in North Korea. There has been a variety of theories and practices to expand the social engagement of art education. The conference will be an occasion to ask questions about the role of art education and to seek its own role in an era of peace and coexistence. I hope that many members will participate in the conference.

Thank you

Ahn, Inki  
President of KoSEA
